The most **complete** partner for dental clinics

Avinent Orthodontics came about through Avinent corporation's desire to continue growing and incorporating new solutions within the oral and maxillofacial field. With state-of-the-art technology, we resolve aesthetic and functional challenges for the new generations.

The best software on the market

Our technical team works with the best software on the market and their years of experience in dental design to achieve the best results for patients.

State-of-the-art technology

We're your most complete partner. At Avinent Group we are leaders in the medical-dental sector thanks to our technological ability and our experience in latest-generation 3D printing.

Professional portal

At Recode, an innovative, intuitive workflow is used, with user-friendly data input for the professional, making the process quick and easy.

Research

We work to be able to offer you, day after day, new solutions that will change the orthodontic and dental sector.

We're here for you

We have a team ready to resolve all your queries, reworking cases and even working together on designs. Proximity is what sets us apart from other orthodontics brands.

Many aligners, few like ours.

Recode Aligners is the brand of invisible orthodontics by Avinent Orthodontics, designed to provide your patients the best possible solutions to improve their smile.

Biomechanically efficient

With greater movement strength and retention

Biocompatible

Material fully suited to the treatment.

Comfortable and innovative

Facilitating initial insertion

Very transparent

Your patients won't notice they're wearing it

Different types of **splints** and **retainers** are also available to supplement your patient's treatment.

Splints

We have tailored splints. Depending on the material, we can design and produce special splints for bruxism with maximum rigidity and special splints for allergens with medium rigidity.

Retainers

Customized retainers are available for both upper and lower arches. We propose a removable retainer with the minimum thickness.

Recode Aligners is the treatment that adapts to the patient's pace of life, whatever their needs.
